

6X DNA loading Buffer

(Cat. No.: S2GNM04g30001)

Description:

The 6×DNA Loading Buffer is the dark blue DNA loading buffer used for electrophoresis, which contains Orange G & xylene cyanol FF as tracking dyes allow users to easily track the movement of sample DNA on the gel during electrophoresis.

Kit Contents:

Contents	S2GNM04g30001
6X DNA loading Buffer	1 ml

Storage:

The 6X DNA loading Buffer is stable at 4°C or long-term storage at -20°C.

Instruction:

When using, add 1 µl 6×DNA Loading Buffer to every 5 µl DNA sample, mix the DNA sample and DNA loading buffer, and directly load to the gel.
